## General Description of the OSCAR Notifications System

The Administrative Handbook, section V.A.2 says (in part):

2. Timely Notification of Submitters - The Principal Herald, either directly or through designated deputies, shall ensure notification of registration by the College of Arms or of return at any level must be made in writing to the individual submitter in a timely manner. Email notification is acceptable, so long as appropriate records are maintained with the submitter's paperwork and paper notification is used where email fails. Public postings (on websites, in newsletters, and the like) do not meet this requirement, although they are encouraged for public relations purposes.

OSCAR includes functionality to send email notifications to assist the Principal Herald (or Submissions Herald or Notifications Herald) in fulfilling this obligation. The OSCAR Notifications System works by sending the submitter an email directing them to come “pick up” their notification; when they do, the notification is marked as “retrieved” and the process is complete. This way, it’s clear when email fails.

Notifications can be sent in two ways, both under the “Notify” link on the main OSCAR menu. The first way is through the “Create from Lol” link and the second way is through the “Add” link.

Note: The “Notify” link on OSCAR will only appear if you have the correct permissions.

## Descriptions of Navigation Links for the OSCAR Notifications System

**Notifications:** Used to send submitters emails about the decisions on their submission.

**Create from Lol:** Used to generate notifications from Internal Letters or External letters that are marked as having decisions made.

**Add:** Add a blank notification; used to add a notification not generated by create from Lol.

**Unsent:** Shows all notifications that need to be edited and sent to the submitter.

**Send:** Shows notifications that can be sent, once a decision has been selected the notification can be sent out

**Remind:** Sends out a second email to the submitter, reminding them to pick up their notification.

Currently OSCAR will only send out reminders once.

**Unretrieved:** shows all notifications that have not been picked up. This screen is the default notifications screen.

**View:** Allows you to search for a specific notification by email address

**Hardcopy:** Any notifications not picked up after 30 days need to have a copy mailed to the submitter. This screen generates letters for notifications over 30 days. Once the Mark as Hard Copy Button is used, the notifications will disappear from your unretrieved notifications list. This option only gives you the text for the letters, you will need to use a word processing program to make the actual letters.

**Show ALL:** Show all the notifications created in OSCAR along with their Status:

Wait: Notification has been created but not emailed to submitter

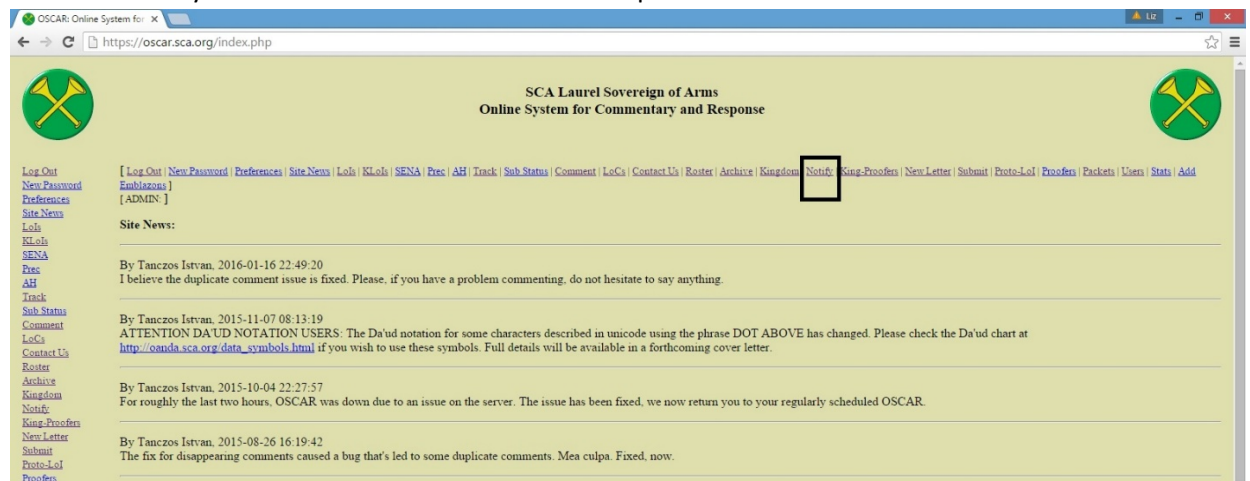

Sent: Notification has been emailed to the submitter

Pick: Submitter has picked up notification

Hardcopy: Submitter has never picked up notification and paper copy needs to be mailed to the Submitter.

## Sending Notifications from the Create from Lol Link

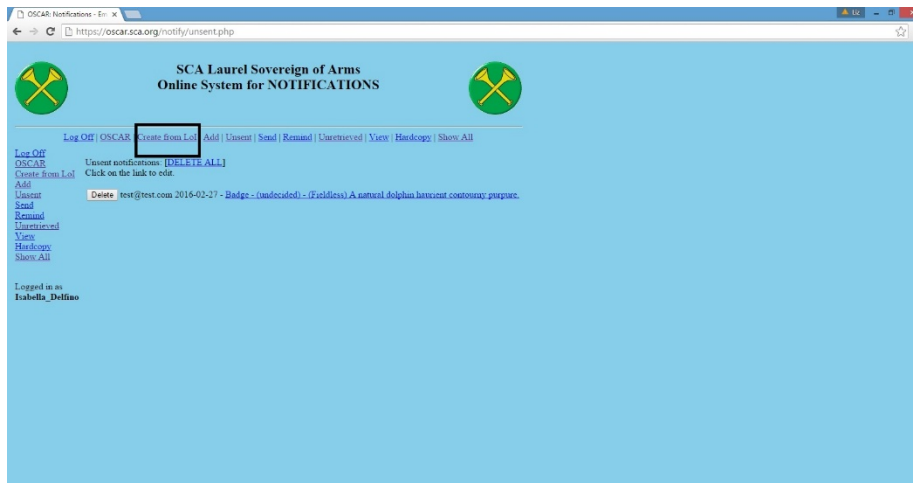

1. Log into OSCAR
2. Select the notify link from either the side menu or top menu

By Seraphina Delfino for the Laurel Office. Permission to use for class handouts and teaching.

02/2016 Version

3. Select the link “Create from Lol”.

4. While it will show you both Kingdom Lols/ILOPs/LoPs and External Lols, only Letters that are decided upon will appear on the list. For kingdom letters to appear as decided upon, the Kingdom Submission herald must change to status of the letter to “decisions issued” in the Kingdom spread in the Kingdom Garden.

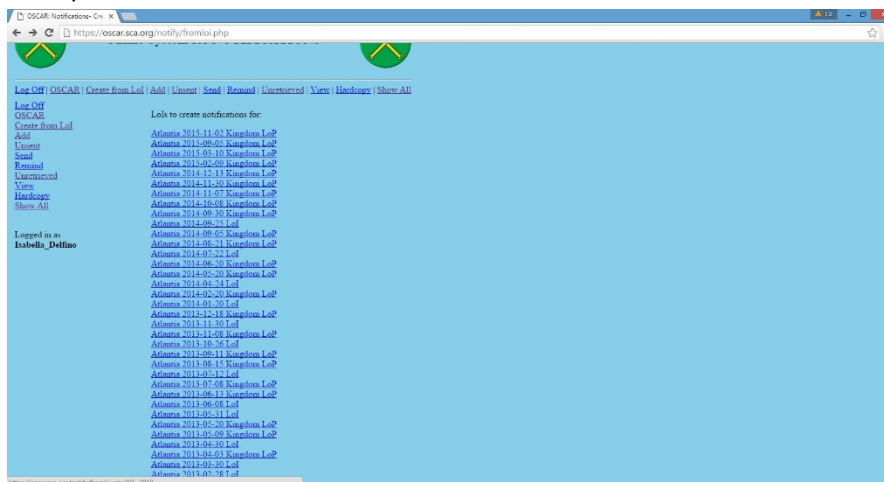

5. From the list, pick the Lol or LoP/ILOP that corresponds with decision letter. Doing this will generate the notifications for you to edit.

Notifications for Internal Letters will show up as [Kingdomname] (Date ) Kingdom Lol/ILOP/LoP

Notifications for Letter of Acceptances and Returns (LoAR): [Kingdomname] (Date) Lol

The Cover letter of the LoAR as has a list of the External Lols included in the LoAR. Typically, it is three months between the Lol and the LoAR date. So, if you are sending out notifications for a LoAR, you will need to look for an Lol that was published three months before the LoAR.

For example, if you are writing notifications for the July LoAR, then the notifications will be for the April Lol

6. To get to the notifications, use the link for Unsent
7. Click on the notification you want to work on

8. Change decision to the appropriate decision. This is based on the decision in the Letter of Decision or the Letter of Acceptance and Returns; OSCAR does not automatically know them.

Edit notification:  
Decision Level should be "Laurel" when the decision was published on an LoAR.  
It should be "Kingdom" when the decision was published on a LoD, ILoD, or LoR.

Client's primary name: Seraphina Delfino  
Email address: test@test.com  
Decision Level: Laurel  
Decision: Undecided  
Submission Type: Badge  
Change:   
Change from holding:   
Content: (Fieldless) A natural dolphin hauriant cantonury purpas

The body of the notification:

9. Fill out the body of Notification (in the big text box) with a letter explaining the results of their submission to the submitter. Having a form letter is a really good idea to make this go faster.

The body of the notification:

Greetings Seraphina Delfino, <br><br>  
We are delighted to inform you that, after in-kingdom commentary and consideration, your badge submission is (Fieldless) A natural dolphin hauriant cantonury purpas. It has been sent to the next and final step of the submissions process. It will now go through the Laurel Herald commentary process with the College of Arms and is scheduled for the July Decision Meeting to be considered for registration by the Laurel Sovereign of Arms. The results of Decision Meetings are usually published at the end of the next month allowing the Sovereigns to write explanations and for proof reading. This process usually takes about six months. At that time you will receive another notification such as this informing you of the Sovereigns' decision. <br><br>  
(Good luck, <br>

Update/Save | Reset

11. Repeat steps 6-9 until all notifications are complete.
12. Once you are ready to send the notifications, select the link for send, then use the send email button.

13. Send out messages to appropriate lists, forums, and social media to let submitters know to look for their notifications. (Optional)

### **Sending a Notification using Add Function**

1. In OSCAR, click on the “Notifications” link.
2. Click on the link for ADD, This will generated a new, blank notification.
3. Fill in all the appropriate boxes with correction information.
4. Click on update/save once you have finished entering the information.
5. Click on the send link.
6. Click the button to send email.

### **Reminders**

If notifications are not picked up in certain time period, I used email lists to try to contact people who have not picked up their notifications.

The most common reason for unretrieved notifications is an incorrect email address. These are the steps to fix an email address and resend the notification.

1. In OSCAR, click on the “Notifications” link.
2. Select the link for Reminders.
3. If you need to edit a notification (say, with a new email address), select the notification and update the information.
4. Click on the update/save button. Unless you do this, the changes will not save!
5. Uncheck any reminders you don’t want to send out. Currently OSCAR only allows for 1 reminder – use it wisely.
6. Click on the button to send email.
