

## Errata

These are corrections to previous LoARs.

### October 1976

West

**Astrum Excubitorius of Alexandria.** Name correction from Astrum Excubitorius.

When the name (and device) were registered, the LoAR left off the locative. All of the forms and even a notification letter use the full name including the locative.

### December 1982

West

**Leon von Schrecken.** Device change. Gules, three swords clockwise in triangle proper within a bordure Or.

When this device change was registered, the LoAR listed it as a new device instead of a device change. The submitter's previous device, *Azure, a lion rampant to sinister gules, fimbriated and orbed, a chief indented Or*, was retained as a badge.

### November 2007

West

**Sine ni Mharbhen.** Reblazon of badge. Sable, an empty drop spindle within a bordure Or.

When this badge was reblazoned, the LoAR mistakenly listed it under *Madelaine de Bourgogne's* name, instead of *Sine ni Mharbhen*.

### April 2010

West

**Gwynnaeth de Sancta Maria de Petra Fertilis.** Reblazon of device. Or, in pale an iris purple slipped and leaved vert issuant from a rock fractured sable.

When this device was reblazoned, the LoAR mistakenly referred to it as a badge.

### February 2012

West

**Tristan Halsson fra Ravensborg.** Reblazon of badge. Argent, a giant dung beetle statant sable.

When this badge was reblazoned, the LoAR inadvertently referred to it as a device. It had been originally registered as a device in February 1975, but had been subsequently changed to a badge in May 1992.

December 2016

**Lochac**

**Ascelin d'Ypres.** Device change. Quarterly per fess indented ermine and purpure.

When this device was registered, the LoAR neglected to note that it was a device change. The submitter's previous device, *Argent, three sprigs of ash inverted conjoined in chief and on a chief purpure four crosses moline argent*, is retained as a badge.
