

Mens names on Merovingian Coins

By Brunissende Dragonette (mka Mathilde Poussin)

These names were collected from: "Liste des noms d'hommes gravés sur les monnaies de l'époque mérovingienne, lettre à M. d'Arbois de Jubainville" by Anatole de Barthélémy¹

Merovingian coins are a durable medium on which names can be found in their original spellings. Some show Kings' names, but most carry the name of the money maker, who was the person warranting their weight and value.

The personal names and place names presented here come from a book found on google book which collected the names and the place names found on Merovingian coins, as well as the modern place where those coins were found. All information was collected and further processed.

Place names were sorted separately. They were sorted alphabetically. Spellings that looked as spelling variants of the same place name were kept. Places with question mark in the book were left with the question mark.

Personal names were already essentially sorted in alphabetical order. However, the author recorded both u & v as v for these. While keeping a version of the names with the same spelling as the book's I have also added an extrapolated version that restores the expected "u", "v" or even "w". Almost all of these spelling we confirmed with the "Nouveau manuel de numismatique du moyen age et modern", by Adrien Blanchet² and fighting through "Die fränkischen elemente in der französischen sprache" by Wilhelm Waltemath³.

The names themselves appear to be only men names. Some are in Latin, some seem to be vernacular. The origins are varied and strong Germanic as well as Roman influences can be felt.
