

Errata

September 1996

Caid

Marcel Longueville. Device correction. Argent, a tyger rampant contourny purpure between flanches azure.

When his device was corrected from the previous registration which left out the purpure, the word *contourny* was inadvertently misspelled.

January 2003

Atlantia

Cedric of Thanet. Device reblazon correction. Argent, a pall inverted embattled between three trillium flowers inverted gules, leaved vert.

When his device, originally registered in August 1989, was reblazoned to specify the orientation of the trillium flowers, the LoAR failed to also note that his pall inverted is embattled instead of plain.
