

**THE FOLLOWING ITEMS HAVE BEEN REGISTERED:****AN TIR**

**Adena Dark Star.** Name (see RETURNS for household name).

**Adena Dark Star.** Device. Per pale azure and gules, a winged domestic cat rampant and in base a square weaver's tablet argent.

**Ailbhe Maighe Nuadhat.** Name.

The submitter requested authenticity for 12th-14th century Irish. Submitted as *Ailbhe Maigh\_Nuadhat*, the genitive form of the locative byname *Magh Nuadhat* was not correctly formed. The correct genitive form of this placename for Early Modern Irish is *Maighe Nuadhat* and we have therefore changed this name to *Ailbhe Maighe\_Nuadhat* for registration. As corrected, this name meets the submitter's authenticity request.

**Ailbhe Maighe Nuadhat.** Device. Per fess vert and azure, atop a grey stone bridge of two spans proper throughout a dove argent.

Submitted as *Per fess vert and azure, atop a grey stone bridge proper throughout a dove argent collared sable*, the collar is too small and indistinct to be identifiable.

We have blazoned the number of spans of the bridge as required by the September 2007 Cover Letter, *From Wreath: On Bridges*.

The bridge is considered argent for conflict purposes, which we ask Morsulus to note in the O&A.

**Alec Greylyoun.** Name.

**Anfelisa l'aguilliere.** Name.

Submitted as *Anfelisa le Aguilliere*, the descriptive byname was not properly formed, as in French, *le/la* elides before a vowel. We have therefore changed this to *Anfelisa l'aguilliere* for registration. This name combines an English given name with a French byname, an acceptable lingual mix per SENA Appendix C.

**Arthur Martel.** Name (see RETURNS for device).

Nice late 12th century English name!

**Beatrix Opitzer.** Badge. (Fieldless) On a bottle gourd slipped and leaved Or an ermine spot azure.

**Ciscilia Bradshaw.** Name.

Nice 14th century English name!

**Ekatarina Petrovna.** Name.

The submitter requested authenticity for 14th to 16th century Russian. This name meets that request.

**Ernst Weissbaum.** Device. Per bend sinister Or and azure, an emmet sable and an anchor argent.

**Finnr Eiríksson Steingrímssonar.** Name and device. Lozengy azure and argent, a rose slipped and leaved sable.

Submitted as *Finnr Eiríksson Steingrímssonar*, diacritical marks must be used consistently throughout a name. We have therefore changed this to *Finnr Eiríksson Steingrímssonar*, as this is the smallest possible change to make to allow registration.

**James Shoemaker.** Device. Azure, a sun in its splendour Or within a decrescent argent, an orle of mullets Or.

Per the January 2026 LoAR, *Charges Within Charges*, the central sun is entirely within the crescent and is thus the primary charge, and the crescent is a secondary charge. As such, this pattern of "A primary charge group, a secondary charge group around the primary charge group, and another secondary (non-ordinary) charge group" is not a documented pattern found in Appendix J.

However, as noted in that Cover Letter, we will consider armory that appeared on Letters of Intent dated prior to June 1, 2026 using our previous guidelines if it benefits the submitter. Under our previous guidelines the crescent was considered primary, and the design fit into the pattern "A primary charge group surrounding a secondary charge, with a separate secondary group", making this device registerable.

**Jane Eagle.** Name.

Nice 16th century English name!

**Jane Eagle.** Device. Per bend sinister azure and argent, an eagle rising Or and a wooden weaver's shuttle bendwise sinister proper threaded gules, an orle Or.

Nice cant!

**Katla máni.** Badge. Sable, a domestic cat sejant guardant within and atop a decrescent, between the horns of the decrescent a mullet argent.

Per the January 2026 Cover Letter, *From Wreath: Charges Within Charges*, the central cat is entirely within the crescent and is thus the primary charge group. As the crescent is not the central charge, it and the mullet between its horns form a single secondary charge group, as per the March 2024 Cover Letter, *From Wreath: Charges Within Charges*.

Nice cant!

**Magdalena Pieters.** Name change from Lucrezia Maddalena Moranducci.

The submitter's prior name, *Lucrezia Maddalena Moranducci*, is released.

**Margaret Palmer.** Badge. (Fieldless) A stag lodged Or.

Nice badge!

**Matteo Malevoli.** Name.

**Nicola di Donato delle Ceste.** Name.

**Nicola di Donato delle Ceste.** Device. Azure, a rabbit rampant argent playing a harp Or, on a chief argent three roses proper.

**Perceval Malherbe.** Name.

Initially documented as a French given name with an English byname, Nest verch Gwilim was able to document both names to France, removing the lingual mix.

**Perceval Malherbe.** Device. Lozengy argent and sable, a mandrake plant gules.

Nice cant!

**Ríán Kjartansson.** Alternate name Akizuki no Zentarou Tatsu'aki.

**Ríán Kjartansson.** Badge for Akizuki no Zentarou Tatsu'aki. (Fieldless) A Japanese stream argent, overall a nadeshiko flower and two maple leaves one and two sable.

The submitter and commenters were able to provide multiple examples from Japanese mon of streams being used as primary charges underlying overall charge groups. Thus, we will consider the Japanese stream an exception to the requirement of SENA Appendix I4 that overall charges or the charges they overlie must be either an ordinary or a long charge, and direct Palimpsest to note this in SENA Appendix I4.

**Sina Erdeneva.** Name change from Susane le Peyntour and device change. Gules ermined, a double-headed eagle and in chief a coronet, an orle Or.

The submitter requested authenticity for Rus/Slavic. While both name elements are documented in Russian from Wickenden, there are 300 years between the dates of the given name and byname. Therefore, we cannot say with certainty that this name is authentic, but it may be, as Wickenden only lists the first temporal instance of a name.

The submitter's prior name, *Susane le Peyntour*, is released.

The submitter is a royal peer of viscounty rank and thus entitled to display a crown.

The submitter's prior device, *Azure semy-de-lys, a yale rampant argent spotted, armed, and gorged of a coronet, a point pointed Or*, is released.

**Sven Gunnarson.** Augmentation of arms. Quarterly azure and counter-ermine, a lion rampant contourny queue-forchy Or, on a bordure argent an orle of chain sable and as an augmentation the lion's sinister paw maintaining a ducal coronet Or.

The submitter is a royal peer of ducal rank and thus entitled to display a ducal coronet.

**Vivant Bataillier.** Name.

Nice 1292 French name from Paris!

**Walter de Antrobus.** Device. Argent, a fess between two chevronels all between three open books gules.

This device does not presume upon the important non-SCA arms of Cardinal de Richelieu, Armand Jean du Plessis, *Argent, three chevrons gules*. There is a DC for the removal of the secondary books, and by precedent, a second DC for the change of the central chevron in the primary charge group to a fess [Evelun Lambert, 09/2021, A-Ansteorra].

## ARTEMISIA

**Aurelia de Focho.** Badge. Per chevron indented argent and purpure, two dragons combattant sable and a flame Or.

Nice cant on *focho*, Italian for fire.

**Cecilia Caravello.** Name (see RETURNS for device).

**Crimson Forge, Shire of.** Branch name and device. Per fess indented sable and gules, an anvil within a laurel wreath Or.

Artist's note: Please draw the indentation of the field division deeper so that they are not obscured by the overlying charges.

**Josurr Úlfsson.** Name and device. Per saltire arrondi sable and azure, a wolf rampant argent.

As an arrondi line is a variant of a plain line, this device is not subject to the restrictions for low-contrast combinations discussed in SENA Appendix H. We direct Palimpsest to rewrite SENA Appendices H and M2 to clarify this point.

Nice cant on the name *Ulf* meaning *wolf*!

**Raina of One Thousand Eyes.** Holding name and device (see RETURNS for name). Gules, a fox rampant argent marked sable maintaining a bow, a bordure nebuly argent.

Submitted under the name *Raina Li{sv}ka St{rv}elec*.

**Reinaldr herkja.** Name and device. Sable, in bend a decrescent and an owl, a bordure nebuly argent.

**Syth Bergeon.** Name.

This name combines an English given name, with a French byname, an acceptable lingual mix per SENA Appendix C.

## ATENVELDT

**Katrina Neumann.** Badge. Quarterly gules and azure, a compass star within an orle Or.

There is a step from core practice for the use of a compass star.

**Leticia Troischesnes.** Badge. Per bend sinister vert and argent, a chess rook and a key counterchanged.

**Sigrun Eiriksdottir.** Alternate name Helena Alexandrik{e-}.

Submitted as *Helena of Alexandra*, the submitter indicated during Kingdom commentary that they would prefer the entirely Greek name *Helena \_ Alexandrik{e-}*. We are happy to register this name entirely Greek, per the submitter's wishes. If the submitter is interested in the entirely Roman form, *Helena Alexandrina*, they may submit a request for reconsideration.

**Sigrun Eiriksdottir.** Release of alternate name Thorunn Eiriksdottir.

**Sigrun Eiriksdottir.** Badge. Quarterly sable and gules, a round shield fracted per bend sinister and in chief a sword fesswise reversed argent.

**Sigrun Eiriksdottir.** Badge association for Helena Alexandrik{e-}. Per bend sable and argent, on a bend azure three wolves passant palewise argent.

**Wasim ibn Rashid al-Azhar ibn Sinan ibn Abd al-Haqq.** Name change from Haukr Bjarnarson.

The submitter requested authenticity for Middle Eastern/Andalusian Spain/Arabic. This name meets that request.

The submitter's prior name, *Haukr Bjarnarson*, is retained as an alternate.

**Wasim ibn Rashid al-Azhar ibn Sinan ibn Abd al-Haqq.** Device change. Sable, a hawk volant Or and in base a rapier fesswise argent.

The submitter's prior device, *Argent, a bear dormant contourny gules and a ford proper*, is retained as a badge.

Nice cant!

## ATLANTIA

**Aemiliana inghean Ui Domhnaill.** Name (see RETURNS for device).

The submitter requested authenticity for 15th-16th century Irish. Submitted as *Aimiliona inghean Ui Domhnaill*, the spelling of the given name was documented using Woulfe, which gives an undated spelling and is not a suitable source for given names per the Administrative Handbook Appendix F. Fortunately, commenters were able to document the spelling *Aemiliana*, and with the submitter's permission we have changed this to *Aemiliana inghean Ui Domhnaill* for registration. As changed, this name meets the submitter's authenticity request.

**Angus Clay Born.** Name and device. Or, three chevronels braced gules and in base a dragon's head couped sable, a chief gules.

The submitter has permission to conflict with the badge of Cornelia vom Distelfeld, *Or, three chevronels braced and a chief gules*.

**Celest Drinkwater.** Name and device. Per pale purple and argent, a heart and on a chief three hearts counterchanged.

Nice Middle English name!

**Erik Redbeard.** Name.

**Fíne ingen Tomaltaig.** Badge. (Fieldless) On a moth Or winged azure two crescents in fess Or.

**Fíne ingen Tomaltaig.** Badge. (Fieldless) On a moth Or winged azure two mullets of four points in fess Or.

**Ian Forester.** Name and device. Per pale Or and vert, a thistle argent between in bend two hunting horns counterchanged.

**Isabetta de Pavonis.** Name and device. Or, a peacock maintaining in its beak a marigold proper and in its talons a hemlock sprig vert.

There is at least a DC between a multi-petaled flower and a multi-floreted flower, so there is not a sword-and-dagger issue with this device.

Submitters and consulting heralds are reminded that charges that have not been registered in a decade or more should be documented as part of the submission. Hemlock has not been registered since 2010. Hemlock sprigs are properly vert, taking their tincture from the stalk, bear a multifloreted argent flower, and are found in William Turner's *New Herball*, c. 1551.

Marigolds are multi-petaled flowers whose proper tinctures are Or or orange, slipped and leaved vert. When orange, the marigold is considered light (and conflicts with Or) on a dark field or dark (and conflicts with gules) on a light field; on a neutral field or on a fieldless badge must be a shade that is clearly light or dark.

We direct Palimpsest to add both these proper tinctures to Table 4 of the Glossary of Terms.

Nice cant on *Pavonis*, meaning peacock!

**Kanamori no Tatsume.** Device. Sable, in pale three umebachi each within an annulet Or.

The umebachi and annulets are co-primary charges.

As with non-central combinations of charges, for repeating combinations of charges such as "three X each within a Y" the charges are considered to be part of the same charge group. We ask Palimpsest to issue a Rules Letter to add this information to SENA Appendix I1.

**Katarzyna Kaczmarska.** Name and device. Sable, a stag with a fox's tail rampant argent, a bordure ermine.

This device is not in conflict with the badge of Ambra Micheli, *Sable, a stag rampant argent and a base ermine*. There is a DC for the change in type of the peripheral ordinary and by precedent a second DC for the addition of a substantial tail to a beast that effectively has none [Alfarinn Refr and Ragnhild Jägerhorn, 06/2021, A-Drachenwald].

**Leandros of the Sciritae.** Name (see RETURNS for device).

Submitted as *Leander\_ of the Sciritae*, the attested Greek form of the given name is *Leandros* and not *Leander*. The form of the name *Leander* is derived from the Greek, but it is a later, Latinized version that is not temporally compatible with the byname. Therefore, with the submitter's permission, we have therefore changed this to *Leandros of the Sciritae* for registration.

**Mór Gwyn.** Name and device. Per saltire argent and purple, in pale a spider and a triskelion of spirals sable.

This name combines a Gaelic given name with an English byname, an acceptable linguistic mix per SENA Appendix C.

There is a step from core practice for the use of a triskelion of spirals.

**Nymanthus Jager.** Name and device. Azure, a tree blasted and eradicated argent and on a point pointed Or a brown squirrel maintaining an acorn proper.

This name combines a Latinized German given name with a Dutch byname, an acceptable lingual mix per SENA Appendix C.

**Sbyslava Ruslanova.** Name and device. Per bend sinister argent and gules, a sun and a goat passant counterchanged.

## AVACAL

**Dáire Ó Lochlainn.** Badge for Derewyn Wodeward. (Fieldless) On a maple leaf vert a hunting horn Or strung sable.

**Erik Rugenson.** Name and device. Per pale purple and vert, a boar rampant argent, an orle of chain Or.

This name combines a Swedish given name with an English byname, an acceptable lingual mix per SENA Appendix C.

The submitter is a knight and thus entitled to display an orle of chain.

## CALONTIR

**Brighid ingen Donngaile.** Badge. Or, a pink flamingo proper.

**Dorcas Whitecap.** Badge. Per chevron gules and sable, a tree stump snagged Or.

**Dragoncina di Cecco.** Device. Gules, on a chevron between three goose's feet inverted argent two stalks of wheat gules.

**Elsbeth Modlen ferch Dafydd.** Device change. Per bend sinister gules and azure, three spoons hanging from a bar coupé Or.

This 'hanging spoons' motif is found in the St. Gallen Armorial, p323 <https://www.e-codices.unifr.ch/en/csg/1084/323>. We will consider the bar to be a secondary charge conjoined to the primary spoons.

The submitter's prior device, *Or, a torteau charged with a sea-horse erect Or, in base a ford proper*, is released.

**Katherine Renée la Cousturière.** Name and device. Per bend sinister argent and purpure, a domestic cat sejant guardant sable and two threaded needles in saltire argent.

**Natasha Aldredsohtor.** Name and device. Papellony sable and Or, a bend purpure, overall a unicorn passant contourny argent.

Submitted as *Natasha Aldredsohtor*, the patronymic byname was not correctly formed. Old English given names ending in *red* form the genitive by adding *es* to the end, not simply *s*. We have therefore changed this to *Natasha Aldredesdohtor* for registration.

*Natasha* is the submitter's legal given name.

**Nikita Pavlovich.** Device. Per fess sable and azure, a sun argent eclipsed sable and a bear rampant argent.

**Olivera Woll.** Device. Argent, an olive tree and on a chief embattled vert three open books argent.

Nice cant!

**Rónán mac Diarmata.** Name and device. Sable, a rainbow bendwise throughout proper, in sinister chief a sea-lion argent.

Nice Middle Irish Gaelic name!

## DRACHENWALD

**Georgette de Montmorency.** Device. Azure, an acorn Or, on a chief argent three alerions azure.

**Georgette de Montmorency.** Badge. (Fieldless) Issuant from within an open wooden chest proper an acorn Or.

We ask Morsulus to note in the O&A that the acorn is equivalent to a tertiary charge.

**Lina Valkon.** Name.

## EALDORMERE

**Hector of the Black Height.** Name and device. Vert, on a bend sinister argent three bells palewise sable.

Commenters were unable to find documentation for the toponymic byname *of the Black Height*. Fortunately, Alys Ogress was able to document *le Blakbank* as an early 15th century placename, and *Black Height* is a plausible *lingua Societatis* translation.

**Hector of the Black Height.** Badge. (Fieldless) A shovel gules.

Nice badge!

**Hector of the Black Height.** Badge. (Fieldless) In pale a tower issuant from a rock sable.

**Hector of the Black Height.** Badge. Argent, three bells sable.

Nice badge!

**Piera Roero.** Device. Azure, on a bend argent a millrind palewise sable.

## EAST

**Annora Jehanne Dubois.** Name.

This name combines an English given name with a French given name and byname, an acceptable lingual mix per SENA Appendix C.

**Annora Jehanne Dubois.** Device. Argent, a moose salient, on a chief embattled vert a pheon inverted between two ermine spots argent.

Originally submitted as a *moose*, this creature was reblazoned at Kingdom as an *elk*. We have restored the term *moose* for registration. Please see the Cover Letter for more detail.

**Anselm Höfer.** Name.**Ástriðr Goðormsdóttir.** Name.

The submitter requested authenticity for Norse. This name may meet that request, however, we cannot be certain. While both name elements are documented to approximately the same time, we cannot be sure that both elements were used in the same place.

**Ástriðr Goðormsdóttir.** Device. Per chevron ployé throughout argent and azure, two serpents erect respectant vert and a sun Or and on a chief azure three suns Or.

**Basil Clarke.** Name.

**Bryget Mylneward.** Device (see PENDS for badge). Argent, a lily gules within a bordure gules semy of bees palewise proper.

**Buckland Cross, Barony of.** Order name Award of the Red Flur.

**Cellach na Graifne.** Name.**Corso Spadini.** Name change from Luca Spadini.

The submitter's prior name, *Luca Spadini*, is released.

**Eleanor de Astlye.** Device change. Azure, a greyhound passant regardant argent between three roses Or.

The submitter's prior device, *Azure, a greyhound passant guardant argent, in base a branch of hazel fesswise Or*, is released.

**Eva Vach Wylt.** Household name Company of the Flying Tygers of the South.

This household name was originally returned by Laurel on the December 2023 Letter of Acceptances and Returns for presumption on the real-world WWII air squadron known as the Flying Tigers. The addition of the locative "of the South" clears this household name of presumption.

**Gwyn de Vere.** Device. Per bend purpure and argent, an owl argent and a Lacy knot vert.

**Luighsech Og inghean Ui Raghallaigh.** Name.

The submitter requested authenticity for 14th century Ireland. Unfortunately, we are unable to document the spelling of the given name to the desired time period. The source for the name, the *Martyrology of Donegal* relies mostly on the 12th century *Book of Leinster*, so this may be a 14th, but we do not know for sure if the name would have been spelled this way at that time or if it is a 17th century form of an earlier name. Therefore, while this name is registerable, it is not authentic.

**Luighsech Og inghean Ui Raghallaigh.** Device. Or, a raven sable atop a mount maintaining over its shoulder a lance fracted in chevron vert.

**Maol Mhuire inghean Ghiolla Chríost Uí hAirt.** Alternate name Rieingulid Trwsgl.

Submitted as *Rhieinwylydd Trwsgl*, the spelling of the given name could not be documented to period. The submitter requested authenticity for 13th century Welsh, and the form of the name that can be documented to this time period is *Rieingulid*. This given name is taken from period literature -- specifically the 12th century *Life of Saint Iltud*, and as Welsh literary names may be registered, we have made this change for registration. While this spelling change allows us to register this name it is not authentic; we do not have evidence for an actual person named *Rieingulid*.

**Maol Mhuire inghean Ghiolla Chríost Uí hAirt.** Badge for Rieingulid Trwsgl (see PENDS for other badge). Purpure, a hand argent hurty, a bordure argent semy of hearts purpure.

**Medhbh inghean Uí Cheallaigh.** Augmentation of arms. Argent, a triskelion of spirals purpure and on a chief embattled vert three towers argent and as an augmentation in canton a chaine shot fesswise gules.

**Pazus Salvi.** Name.

**Percival Michaelson.** Badge. (Fieldless) On a mullet of eight points sable a rapier bendwise inverted argent.

**Quintus Lucius Fortunatus.** Badge (see RETURNS for household name). Gules, a bull passant contourny, in chief the phrase "LEGION VI" Or.

**Scolastica la souriete.** Heraldic title Inkpen Herald.

**Sinead inghean Uí Ceallacháin.** Name.

Nice late 16th century Irish Gaelic name!

**Sinead inghean Uí Ceallacháin.** Device. Per chevron inverted argent and sable, a leaf bendwise sinister vert and three mullets of seven points argent.

**Tore Rauðfeldr.** Name (see RETURNS for device).

**Wissel von Dragendorff.** Name.

Submitted as *Wissel von Dragendorff*, we were unable to document the submitted spelling of the byname to period, as the reference in Bahlow is undated. However, Lillia Crampette was able to date the desired spelling of the byname to 1580. We have therefore registered this name as submitted.

**Wissel von Dragendorff.** Device. Argent, on a spider sable between three roses sable barbed gules a rainbow proper.

## LOCHAC

**Willow Wren of Silverstone.** Name change from Willow Wren.

The submitter's prior name, *Willow Wren*, is released.

## MERIDIES

**Ása Kolbrún.** Device. Argent, two sheep rampant sable and in chief an arrow fesswise reversed azure, a base wavy vert.

**Brighid O'Cassidy.** Name and device. Azure, a winged opossum rampant maintaining a scepter, a chief inverted argent.

**Cúán of Cork.** Name and device. Azure, a stag's skull argent transfixed through the eye sockets by an arrow fesswise Or.

Submitted as *Cúán of Cork*, *Cork* is the modern spelling of the Irish town. As the locative is registerable as the *lingua Socetatis* form of the Anglicized Irish *of Corke*, we have registered this name as submitted. The submitter also requested for the locative *Cobn* if it could be documented. We were unable to do so. If the submitter is interested in the 13th century locative form *de Cork*, or the Anglicized Irish *of Corke*, they may make a request for reconsideration. As changed, this name mixes a Gaelic given name with an Anglicized Irish byname, an acceptable lingual mix per SENA Appendix C.

**Elior of Guildford.** Name and device. Argent, a maple leaf fesswise reversed gules and a tierce sable.

**Emeralds Gate, Shire of.** Branch name and device. Sable, in pale a laurel wreath Or and a wall throughout issuant from base argent gated vert, on a chief argent three step-cut emeralds vert.

Submitted as *Stronghold of Emeralds Gate*, the designator *Stronghold* is only used when a branch is tied to a military installation and not a particular geography. As this group is geographically constrained, we have changed this to *Shire of Emeralds Gate* for registration.

As the masoning of a wall is an artistic detail rather than a field treatment, it does not count as a tincture for the purposes of complexity count. Thus, this design has a complexity of eight: Sable, Or, argent, vert, wreath, wall, chief, gems.

**Gwenhwyfar verch Ydeyde.** Name change from Rhys Faber.

The submitter's prior name, *Rhys Faber*, is released.

**Subutai the Tiger.** Name and device. Per bend gules and purpure, a bend dovetailed between a compass star and a natural tiger rampant argent marked purpure.

There is a step from core practice for the use of a compass star.

**Tarlan Lewyngstoun of Iona.** Household name House of Lewyngstoun.

**Pyra gandr.** Name and device. Per bend vert and sable, a fox rampant, in base a sheaf of three arrows argent.

**Ulrich Guotman.** Name (see RETURNS for device, household name, and badge).

Submitted as *Trißler Guotman*, this name was not correctly formed as both name elements were bynames. With the submitter's permission, we have changed this to *Ulrich Guotman* for registration.

## MIDDLE

**Fiachra an Chleitigh.** Name and device. Vert, a moth per pale sable and argent.

**Ioannes doruphoros ho kai Gigaballos.** Name change from Ioannes doruphoros.

The name phrase *Ioannes doruphoros* is registered to the submitter and used under the Existing Registration Allowance.

The submitter's prior name, *Ioannes doruphoros*, is retained as an alternate.

**Kateryn Stylyngflete.** Badge. (Fieldless) A blonde light-skinned demi-maiden proper vested vert maintaining in her dexter hand a firework arrow enflamed and in her sinister hand a wheel gules.

This is the defining instance of a *firework arrow*, a charge found in Guillim's *A Display of Heraldry* f. 95r blazoned as *a barbed arrowe wth a fyerworke placed neare the heade therof enflamed*.

Nice cant!

**Lucius Bracco Rosso.** Badge for House of the Golden Torch. Sable, a torch irradiated Or.

There is a step from core practice for irradiating a charge with the same tincture. We direct Palimpsest to add this to SENA Appendix G.

**Megha Hamilton of the Middle.** Name and device. Azure, in pale a tree blasted argent issuant from a cracked egg Or.

*the Middle* is the registered name of an SCA branch.

Originally appearing on the East kingdom's Letter of Intent this month, the submissions were accidentally misplaced after being submitted at Pennsic. Fortunately, we were able to determine the correct kingdom of residence.

**Tavish MacIver.** Name and device. Argent, three scarpes vert between a dog's head coupé collared and a triquetra sable.

## NORTHSHIELD

**Aemilia Tacita.** Alternate name Arneiðr Langlíf.

**Angus Lachlan Mackintosh.** Name and device. Argent, a domestic cat rampant maintaining a heart gules, a double tressure vert.

**Atlas Walraven.** Badge. (Fieldless) A capybara sejant argent spotted of diverse tinctures.

There is a step from core practice for the use of a creature other than the English panther spotted of diverse tinctures.

**Beatrice Domenici della Campana.** Badge. (Fieldless) A bee fesswise argent.

**Benzino Bocconi.** Device. Per bend sable and gules, in bend sinister a sun argent charged with a decrescent sable and a hand Or.

**Chiara Datucci.** Device. Sable, on a demi-sun issuant from base Or a needle sable, in chief a rod of Asclepius argent.

**Cobflaith ingen Sitriucca meic Ímair.** Alternate name Ozenda Iniguiz Navarr.

**Eithni ingen Talorgain.** Badge. (Fieldless) An open book argent grillage sable bound vert.

**Eithni ingen Talorgain.** Badge. Per pale gules and azure, a tree blasted and eradicated argent and a grey stone proper, on a point pointed Or a flesh-pot sable.

The stone is considered argent for the purpose of conflict, which we request Morsulus to note in the O&A.

**Evelyn Mackean.** Name.

**Gabriel andvaka Kj{o,}tvason.** Heraldic title Espada Herald.

**Gwenhwyvar verch Owen ap Morgan.** Badge. (Fieldless) An eight-tailed fox courant argent gorged of a chain, maintaining by the tips of its ears an embattled coronet Or and maintaining in its mouth a laurel sprig vert.

Though the fox is blazoned as maintaining rather than wearing the coronet to be consistent with the submitter's other badges, our usual policy on crowned animate charges applies here and the coronet does not count for difference.

The submitter is a royal peer of county rank and thus entitled to display an embattled coronet. A chain gorging an animate charge does not count as an annulet of chain, and is not reserved to the Order of Chivalry.

The submitter requested that the badge (*Fieldless*) *A three-tailed fox sejant erect argent charged on the shoulder with an annulet azure* be released. That badge was released in January 2023.

**Isabeau Sauterau.** Name (see PENDS for device).

Nice 15th century French name!

**James de Beaumont.** Alternate name James le publicain.

Nice mid-15th century French name!

**James de Beaumont.** Badge. (Fieldless) On a goutte de larmes an eye argent.

**Kajsa Mulikka Metsästä.** Name and device. Per chevron rayonny vert and Or, two lynx's heads coupé addorsed argent and two trees blasted sable.

**Kaulder of Blackgate.** Name and device. Gyronny arrondi of twelve argent and purple, a mantis shrimp passant gules.

This is the defining instance of a mantis shrimp in SCA heraldry. The submitter provided evidence that Mantis shrimp were known to Aristotle and to the ancient Assyrians and thus are registerable under SENA A2B2b.

**Matthias of Rolling Oaks.** Name and device. Per pale sable and gules, a moose passant argent.

Prior precedent requiring the use of the term *elk* rather than *moose* has been overturned. See the Cover Letter for details.

**Morgan O'Malley.** Name and device. Per bend sinister sable and argent, a bend sinister gules between a skull and three hearts counterchanged.

This name is clear of the registered *Morgan Ni Mhaille* under SENA PN3C2, Substantial Change to the Sound of One Syllable, as *Ni* versus *O* is different enough to prevent conflict.

**Olivia Grace.** Name (see PENDS for device).

Nice 16th century English name!

**Sibillia d'Orange.** Alternate name Nonia Septima.

**Sigenant Eisenhardt.** Name and device. Sable, a dragon's head erased, on a chief embattled Or an arrow gules.

The submitter requested authenticity for 14th century German. The spelling of the given name *Sigenant* is interpolated, utilizing an i/y letter swap pattern for German, rather than attested. Additionally, the byname *Eisenhardt* is dated to the 16th century. Thus, while this name is registerable, it is not authentic.

**Pora Sigurðardóttir.** Alternate name Tur Be{s,}e bint Kara Tu{gu}rul.

The submitter requested authenticity for 16th century Ottoman Turkish. This request was not noted on the Letter of Intent. Kingdoms are reminded that all authenticity requests must be summarized on the Letter of Intent to ensure a name does not need to be pended for further research. Fortunately, Skaia Esperance was able to identify this request in commentary with enough time for commenters to respond. This name meets that request.

**Tobias Angelos.** Name and device. Argent, a hare attired rampant and a stag rampant addorsed sable and on a chief triangular azure three crescents argent.

This name combines an Italian given name with a Greek byname, an acceptable lingual mix per SENA Appendix C.

**Ulrich MacKnaughtaine.** Name (see RETURNS for device).

Submitted as *Ulrich Aeowulf MacNaughtine*, no documentation was provided for the name *Aeowulf*, and we have dropped this element for registration. Additionally, the spelling of the byname was not adequately documented. The spelling of the byname that was documented was *MacKnaughtaine* and this spelling can be used with the given name. Thus, we have changed this name to *Ulrich \_\_\_ MacKnaughtaine* for registration. *Ulrich* is a German given name that has been borrowed here into English.

Submitters are reminded that all name elements should be adequately documented and that any justifications for a spelling that differs from what is documented should also be included in the documentation.

**Una kottr.** Name and device. Argent, a winged rhinoceros rampant within an orle purple.

Nice 9th-11th century Old Norse name from Iceland!

**Yague Antolinez.** Name.

**Yusuf ibn Tariq al-Mansur al-Tarabulusi.** Name and device. Azure, on a fess argent a chalice between two fleurs-de-lys gules.

## OUTLANDS

**Æsa Læknir.** Name and device. Per fess azure and argent, two clews of yarn argent and a moose's head erased sable.

Nice 9th-11th century Old Norse name from Iceland!

Prior precedent requiring the use of the term *elk* rather than *moose* has been overturned. See the Cover Letter for details.

**Ekaterina Branaina.** Name and device. Per chevron inverted argent and vert, in chief a cat herissony sable.

The submitter requested authenticity for 11th century Byzantine.

Submitted as *Ekaterini Branaina*, a consistent transliteration scheme must be used throughout a name. Therefore, to keep the transliteration scheme constant, we have changed this to *Ekaterina Branaina* for registration. This is the smallest possible change we can make for registration. As changed, this name

likely meets the submitter's authenticity request, but we do not have enough information to know for certain.

**Feylan Ulfsdottir.** Name (see RETURNS for device).

This name combines an English given name with a Norwegian byname, an acceptable lingual mix per SENA Appendix C.

**Gaylord Gaye.** Exchange of primary and alternate name {S,}eruda bint Mihail.

The submitter's former primary name, {S,}eruda bint Mihail, is now an alternate name.

**Gaylord Gaye.** Household name Ketilsgarðr.

Submitted originally as *Cauldron Keep*, this household name conflicts with the Barony of Septentria's *Order of the Cauldron*. As we have been unable to obtain permission to conflict from the Barony, the submitter indicated that they would prefer the Old West Norse household name *Ketilsgarðr*, meaning *Ketil's house*. Therefore, we have made this change for registration.

In addition, the submitter requested authenticity for 11th-12th century Norse. As modified, this household name is authentic for 13th-14th century Old West Norse, but not for the 11th-12th century in any Old Norse dialect.

**Gaylord Gaye.** Change of badge association from Ketilriðr Gandr í Ketilsg{o,}rðum to Ketilsgarðr. (Fieldless) On a cauldron sable a triquetra argent.

**Gaylord Gaye.** Household name Kitsunejima-ke and badge. (Fieldless) On a tortoise-shell plate argent marked, the kanji "kitsune" gules.

The submitter requested authenticity for Sengoku or Early Japan. Submitted as *Kitsunejima-ke* <kanji spelling> we only register names transliterated into Latin characters. Fortunately, we were able to contact the submitter, and obtain clarification that the submitter did not intend to register the kanji, and that the kanji was provided as a gloss to ensure that their intent was clear. We have therefore dropped the kanji for registration. As registered, this name meets the submitter's authenticity request. See the Cover Letter for more information.

**Gregor Zvesdodrag.** Name and device. Argent, an owl displayed sable, overall on a fess gules three hunting horns argent garnished and stringed Or.

This name combines a German given name and a Slavic byname, an acceptable lingual mix per SENA Appendix C.

**Rowena Colebrok.** Device. Per fess azure and argent, two polypuses argent and a grenade sable enflamed gules.

- *Explicit littera accipiendorum* -

**THE FOLLOWING ITEMS HAVE BEEN RETURNED FOR FURTHER WORK:****AN TIR**

**Adena Dark Star.** Household name House of the Saracens.

This household name is returned under SENA NPN5B3, Derogatory Stereotypes, and NPN5B4, Offensive Political Terminology. The term *Saracen* is an outdated term used to refer, often in a derogatory manner, to Muslims. While this was the term used in period in much of Western Europe to refer to Muslims, it was primarily used as a way to "other" Muslims and dehumanize them -- essentially to play to xenophobic or religious prejudices. This is not a pattern of language usage that we want to perpetuate within the Society and therefore, we will not be registering the word *Saracen* as part of a household name or otherwise. See the Cover Letter for more information.

**Arthur Martel.** Device. Vert, a pall cotised argent.

This device is returned for conflict with the device of Moira Ramsay, *Vert, a pall between three rams' heads erased argent*. There is a single DC for the change of type of secondary charge from ram's heads to cotises.

**Deva Avdeevicha.** Device. Or estencelly gules, a four-petalled clematis purpure slipped vert.

This device is returned for conflict with the device of Lowri Amarawd o'r Maes, *Or, a basil flower purpure, slipped and leaved vert*. There is a DC for the addition of the sparks, but no difference for type, orientation or for the slipping and leaving between the flowers.

**Guillaume de la Ferté-Macé.** Badge. Vert, a chalice Or.

This badge is returned for conflict with the device of Kalara of Lochmere, *Vert, a chalice Or and in chief a fish haurient embowed argent*, with a single DC for the removal of the secondary charge, and the device of Graffico de Drell, *Vert, entwined about a chalice Or, a serpent head to sinister sable*, with a single DC for the removal of the serpent, which is equivalent to a tertiary charge.

We direct Morsulus to list Graffico's serpent in the O&A as a tertiary rather than a co-primary charge.

**Xenophon Philippikos.** Badge. (Fieldless) Two serpents entwined palewise argent.

This badge is returned for conflict with the device of Hallþórr Úlfgarðarson, *Azure, two snakes palewise tails nowed entwined at the necks argent*. There is a DC for the field, but nothing for the position of the heads or the tails of the snakes.

**ARTEMISIA**

**Cecilia Caravello.** Device. Per pale lozengy argent and sable and purpure, an owl striking face to dexter Or.

This device is returned for conflict with the badge of Genevieve Marie Etienne de Montagne, *(Fieldless) A hummingbird rising wings addorsed Or*. There is a DC for the field, but per SENA Appendix M1d, birds striking conflict with other birds in their category in the same posture group. As owls and hummingbirds are both regular-shaped birds, and rising and striking are in the same group per SENA Appendix L1b, there is no DC between them in this posture.

There is a step from core practice for the use of a bird striking.

**Novius Iulius Tacitus.** Device. Gules, on a plate an annulet within two delfs voided and fretted gules.

This device is returned for conflict with the device of Edwin Bersark, *Gules, a roundel so drawn as to represent a round shield battered in long and honourable service, argent*. There is a single DC for adding the tertiary charges.

**Raina Li{sv}ka St{rv}elec.** Name.

Submitted as *Raina Li{sv}ka St{rv}elec*, this name uses the masculine form of the second byname. However, as the submitter has only allowed changes to the spelling of the given name, we must return this name. The submitter may be interested to know that the feminine form of this name would be *Raina Li{sv}ka St{rv}elkyn{ev}*.

Additionally, the name was submitted with non-Latin characters on the Society Name/Name Being Registered line on the submission form. Submitters and Submission Heralds are reminded that our assumption is that the content of that line is what the submitter would like registered. Additionally, if the submitter has stated that no changes are allowed, unless stated otherwise in documentation, commentary, or in a private note to the relevant Sovereign of Arms, no changes should be made between the Society Name/Name being Registered section on the form, and on the electronic LoI. Changes between the two, unless otherwise documented, is grounds for an administrative return. As we have no evidence that the submitter approved the change of dropping the Cyrillic characters, we are forced to return this name on administrative grounds.

The submitter's device is registered under the holding name *Raina of One Thousand Eyes*.

**ATENVELDT**

None.

**ATLANTIA**

**Aemiliana inghean Ui Domhnaill.** Device. Per chevron azure and Or, a chevron sable between two clews of yarn Or and a brown weasel rampant proper maintaining a needle sable.

This device is returned for violation of SENA A3D2a - Slot Machine. As the maintained needle is in the same charge group as the secondary charge holding it per SENA Appendix I5, the secondary charge group is made up of three different charges, the yarn, weasel and needle.

**Leandros of the Sciritae.** Device. Azure, a sea-horse between in fess a hammer and a sword argent.

This device is returned for conflict with the device of Eilonwy Andereth, *Azure, a unicornate sea-horse erect regardant argent*. There is a DC for adding the secondary charge group, but nothing for the position of the head or the absence of the horn.

**AVACAL**

None.

**CALONTIR**

None.

**DRACHENWALD**

None.

**EALDORMERE**

None.

**EAST**

**Quintus Lucius Fortunatus.** Household name Legio Sextus.

Submitted as *Legio Sextus*, the previous household name submission *Legion VI Victrix* was returned on the 02/2025 LoAR:

This name is returned for presuming upon the historical Legion VI Victrix, a legion of the Imperial Roman Army.

At that time, we stated that removing or changing *Victrix* or changing the numeral would clear presumption. While Roman legions were generally numbered in the order in which they were founded, over hundreds of years some legions were lost in battle or dissolved for other reasons and then refounded later using the same ordinal number so that there could in theory be multiple legions bearing the same ordinal identifier over the course of Roman history, though not usually existing at the same time. Therefore, removing *Victrix* would clear this household name of presumption.

That said, this household name is not correctly formed. *Legio* is a feminine noun, therefore the feminine form of *Sextus* should be used, which is *Sexta*. Correcting the grammar to *Legio Sexta* however, creates a conflict with the registered *Sextant Herald*. Both *sextant* and *sexta* have an identical number of syllables, and bar the change of the last two letters, are identical in spelling. While *-nt* does contribute to difference, the schwa at the end of the *sexta* is insufficiently different from the *-nt* sound at the end of *Sextant* to clear conflict, and we are forced to return this household name.

**Tore Rauðfeldr.** Device. Per chevron sable and argent, two axes in saltire argent and a drakkar oars shipped proper sailed gules.

This item was withdrawn by the submitter.

## LOCHAC

None.

## MERIDIES

**Ulrich Guotman.** Device. Per chevron azure and sable, a chevron between two owls rising, wings displayed, and a wolf's head cabossed argent.

This device is returned for conflict with the device of Terrell al-Qassab, *Per chevron azure and sable, a chevron between two cleavers in saltire and a lotus flower in profile argent*. There is a DC for the type of secondaries, but the owls cannot be in saltire, so the change in arrangement of the secondary charge group is forced and thus not worth a second DC.

**Ulrich Guotman.** Household name House of Dullahan.

This household name has been withdrawn by the submitter.

**Ulrich Guotman.** Badge. Per fess purpure and vert, a lantern and two bones in saltire argent.

This badge has been withdrawn by the submitter.

## MIDDLE

**Lucas Daundelyon.** Device. Per chevron azure and argent, in chevron three eight-point mullets Or and a crow sable.

This device is returned for conflict with the device of Zahira de la Sara, *Per chevron azure and argent, three suns Or and a natural sea-tortoise vert*. There is a DC for the change in type of the lower charge from a tortoise to a bird, but there is no DC for the tincture as there can only be one DC for changes to the smaller 'half' of a charge group per A5C2d. Likewise, there is no DC for changing the arrangement of the mullets and suns, as per Table 7 of the Glossary of Terms, the difference between three charges in fess

or in chevron when only on the upper portion of a field divided per chevron is an unblazonable artistic detail.

**M{ev}ryem al Ixbil{iv}a.** Device (see PENDS for badge). Per fess and per saltire Or and azure.

This device is returned for conflict with device of Ottar Hrafnsson, *Gyronny arrondy Or and azure* and the badge of John Paul Devereaux, *Gyronny of six azure and Or, a bordure counterchanged*, and for presumption on the important non-SCA arms of Campbell, Duke of Argyll, *Gyronny Or and sable*. In each case, the necessary difference hinges on the treatment of *per fess and per saltire* when compared to *gyronny*.

Though SENA A5F1b says that "Gyronny (of six or more pieces)...[is] substantially different from all other partitions", this rule is intended to compare fields in the categories listed, not to account for all conceivable combinations of different field divisions, and we direct Palimpsest to adjust the wording accordingly.

SENA A5F1b also says that "Lines of division not mentioned here explicitly may be determined to be substantially different on a case by case basis". We hereby decline to grant an SC between a gyronny field and other combinations of field divisions such as 'per fess and per saltire' that result in radially divided fields of six or more pieces,

SENA A5G1b says that "A change in direction of half the lines of a design gives a distinct change". Though there is a blazonable difference between *gyronny of six*, which has equally divided gyrons, and *per fess and per saltire*, which has the lines of division issuing from the corners, there is not sufficient change in direction between them to grant this DC. Since there is also no DC between gyronny of different numbers of pieces per A5G1d, there can be no DC between this field and gyronny of any number.

## NORTHSHIELD

**Gilchrist O'Faolain.** Name and device. Per fess indented Or and vert, a Latin cross formy sable.

This name is returned under SENA PN3C1, Changes to the Sound of Two Syllables. The name as submitted is identical in sound to *Gilcríst O'Phelan*, registered in April 2000, and thus cannot be registered. Additionally, the name is incorrectly formed as it uses the Anglicized Irish *O'* with the Gaelic *Faolain* in the same name phrase. The fully Gaelic form would be *Ó Faolain*.

This device is returned for presumption upon the badge of the Teutonic Order, *(Fieldless) A Latin cross formy sable fimbriated argent*. There is a DC for the field, but no difference for the fimbriation per SENA A5C1.

**Søren Norðmannson.** Badge. (Fieldless) A cloud bendwise argent conjoined in dexter base to a pen Or, nib enflamed gules.

This badge is returned for a lack of clarity of charge groups under SENA A3D1. The pen and flame are ambiguous as to whether they are secondary, tertiary, or overall charges.

**Ulrich MacKnaughtaine.** Device. Sable, a wolf's head cabossed and winged argent.

This device is returned for conflict with the device of Fandral Silverfox, *Sable, a fox's mask argent*. There is a single DC for adding the wings, but no difference between different kinds of canine heads.

## OUTLANDS

**Feylan Ulfsdottir.** Device. Per pall inverted purpure, sable, and argent, two wolves combattant argent, three drinking horns fretted in triangle sable.

This device is returned as the arrangement of the horns must be blazoned separately from the rest of the primary charge group, contrary to SENA A3D2e, Unity of Arrangement.

Though we consider sheaves and charges crossed in saltire to be single charges for the purposes of this rule, we are not willing to extend this exception to charges fretted in triangle, absent documentation of this arrangement as part of a larger charge group in period heraldry.

- *Explicit littera renuntiationum* -

**THE FOLLOWING ITEMS HAVE BEEN PENDED UNTIL THE August 2026 LAUREL MEETING (OR AS NOTED):**

**ATLANTIA**

**Mary Champernowne.** Device. Azure, on a pale argent a winged catamount rampant regardant sable.

This device is pended for redraw to draw the wings of the catamount larger as they are currently too diminutive to be considered as half the charge, and to clear them of the tail to increase identifiability. The pale may be drawn wider to provide sufficient space for these changes.

This was item 12 on the Atlantia letter of December 9, 2025.

**CALONTIR**

**Devis in le Breres.** Device. Per pale vert and sable, three lozenges conjoined in pale between two sprigs of blackberry, a bordure argent.

This device is pended to redraw the lozenges larger so that they are clearly the primary charges. Lozenges conjoined in pale are equivalent to a pale fusily and thus must be the primary charge in this design. The sprigs and bordure may be drawn smaller to accomplish this aim.

Nice cant!

This was item 2 on the Calontir letter of December 4, 2025.

**EAST**

**Bryget Mylneward.** Badge. (Fieldless) A lily gules slipped and leaved vert between and conjoined in fess to two bees in chevron proper.

This badge is pended to draw the bees larger so that they are more identifiable.

This was item 8 on the East letter of December 30, 2025.

**Gunnar þenja.** Device. Argent, on a mountain of three peaks coupé sable peaks enflamed gules two axes in saltire argent, a chief indented vert.

This device is pended to redraw the mountain with a flame issuant from each of the three peaks, consistent with period examples.

This was item 14 on the East letter of December 30, 2025.

**Maol Mhuire inghean Ghiolla Chríost Uí hAirt.** Badge for Rieingulid Trwsgl. (Fieldless) Two passion nails crossed Or on a heart purpure.

This badge is pended to await the outcome of the April 12th Rules Letter on forms of heraldic display. Under our current standard, the heart is a medium of display, so it cannot appear alone and charged in a fieldless badge per SENA A3A2. However, under the proposed rules as currently drafted, this is registerable as a display of *Purpure, in saltire two passion nails* as long as that design is clear of conflict.

This was item 19 on the East letter of December 30, 2025.

**MIDDLE**

**M{ev}ryem al Ixbil{iv}a.** Badge. (Fieldless) On a cross pointed vert a mullet of eight points throughout argent.

This badge is pended to redraw the tertiary mullet through using a period depiction.

This depiction of a mullet of eight points composed of two overlapping delfs will not be registerable without documentation.

This was item 7 on the Middle letter of December 31, 2025.

## **NORTHSHIELD**

**Heymish Nisbet.** Badge. (Fieldless) In fess a pennant purpure staved sable sustained by a bear rampant argent.

This badge is pending to await the result of the April 12th Rules Letter on forms of heraldic display.

Under our current rules, this badge must be returned for appearing as if the bear is a supporter of the pennant, which is a form of heraldic display.

This was item 7 on the Northshield letter of December 17, 2025.

**Isabeau Sauterau.** Device. Per pale sable and argent, a rose slipped and leaved and in base a goutte, within an orle of thorn vine gules.

This device is pending to redraw the secondary goutte larger so that it is more identifiable.

Orles composed of charges such as vine, chain, belts and rope count as peripheral ordinaries for the purposes of SENA Appendix J, so this is a documented arrangement of charges under that rule.

This was item 8 on the Northshield letter of December 31, 2025.

**Itta of Jararvellir.** Device. Vert, three chevronels argent, and in base a bird volant argent.

This device is pending to redraw the chevronels as a properly central primary charge group. Though a central ordinary can be moved slightly to chief by secondary charges in bases, they should remain approximately central.

This was item 8 on the Northshield letter of December 17, 2025.

**Matheus Geirróðarson.** Device. Per pale azure and argent, in fess a bull's head cabossed between a pair of wings counterchanged.

This device is pending awaiting the outcome of the April 6th LoPaD on primary charge groups.

SENA Appendix I reads "Where one or more charges overlie the line of division, those charges are the primary charge group and the other ones are in a secondary charge group", making the head primary and the wings secondary. However, the charges here are in a unified arrangement and together fit our definition of a charge group, "a group of charges of approximately the same size and visual weight that act as a single visual unit".

This was item 10 on the Northshield letter of December 17, 2025.

**Olivia Grace.** Device. Sable, a sea-mew and on a chief argent three skulls gules.

This device is pending to redraw the eye sockets so that the chief is not visible behind them, per precedent "Period heraldic examples of skulls have the eye sockets in the same tincture as the skull or a range of darker shades of that tincture, up to and including black." [Vladimir Kraskov, 06/2025, A-Caid]

This was item 11 on the Northshield letter of December 17, 2025.

**Owen Alun.** Badge. Loons-cut sable and argent.

The badge is pending for further discussion about conflicts with animal-cut designs, specifically whether there should be an SC or a DC between this design and those of the devices of Sigrothr Melrakki, *Wolves-*

*cut sable and argent* and Katrina MacCullauch, *Per pale argent and sable, two swan's heads respectant couped counterchanged*.

This badge does not conflict with the device of Stephen Baran, *Per pale sable and argent, two raven's heads erased contourny counterchanged* or the device of James Blackhawk, *Per bend argent and sable, two falcon's heads erased counterchanged*, with a DC for the orientation of half the charge group, and another a DC for the type of bird's head.

This was item 14 on the Northshield letter of December 31, 2025.

**Svena Gandalfsdottir.** Device change. Quarterly gules and sable, in fess a sword inverted between two wolves' heads erased and addorsed argent.

This device is pended to await the result of the April 6th LoPaD on mixed primary charge groups. As defined in Appendix I, the charges are co-primary, but they are not a single visual unit.

If registered, the submitter's prior device, *Azure, a pale Or between two penguins addorsed proper*, is released.

This was item 14 on the Northshield letter of December 17, 2025.

- *Explicit* -
